Subject Proposed Deepwater Port -- BHP's application

Hi Trent: I am writing to let you know that we have a revised application that replaces the December 2003 application. You had sent comments on that application on January 13, 2005. With the revised emission estimates the proposed LNG deepwater port is not subject to PSD. However, I would like to let you know of the revised application. As usual, when we propose a draft permit, you or your office could send us comments, if any. We think that sometimes this spring we will propose an air permit. I'll put your name in our mailing list to make sure you are notified. Please also pass this message to those who may have an interest in this proposed facility.

Please call me if you have any question. I am attaching the new application, it is in pdf and I hope you can easily open it.

Cabrillo Port Air Permit appl_Final_120205.pdf
